# Apple Pollination Chart

40 apples in bloom groups, early to late, with a partner grid on page 2.

Trees in the same or a neighboring bloom group flower at the same time and can pollinate each other. Check off the trees you grow or plan to buy, then check that each has a partner in its own group or the next one.

# Apple Pollination Chart

Which apples pollinate each other: 24 varieties.

Find the tree you want fruit on in the left column and read across. A check mark means the variety at the top of that column can pollinate it: a partner the sources name for it, or a tree that blooms with it. Pairs the sources call incompatible are left out. Numbers across the top match the numbers down the side.
