EVERYORCHARD · FREE PRINTABLE

Pear Pollination Chart

22 pears in bloom groups, early to late, with a partner grid on page 2.

Trees in the same or a neighboring bloom group flower at the same time and can pollinate each other, except Bartlett and Seckel, which the sources call incompatible. Check off the trees you grow or plan to buy, then check that each has a partner in its own group or the next one.

Group 1

- ☐ Shinseiki *
- ☐ Yoinashi

Group 2

- ☐ Bartlett
- ☐ D'Anjou
- ☐ Golden Spice
- ☐ Harrow Delight
- ☐ Luscious †
- ☐ Parker
- ☐ Patten
- ☐ Seckel
- ☐ Summercrisp
- ☐ Ure

Group 3

- ☐ 20th Century *
- ☐ Chojuro
- ☐ Hosui
- ☐ Kieffer *
- ☐ Korean Giant
- ☐ Moonglow
- ☐ Shinko
- ☐ Warren *

Group 4

- ☐ Bosc
- ☐ Comice

* self-fertile: crops alone, better with a partner † triploid: needs partners, can't pollinate others

Pear Pollination Chart

Which pears pollinate each other: 22 varieties.

Find the tree you want fruit on in the left column and read across. A check mark means the variety at the top of that column can pollinate it: a partner the sources name for it, or a tree that blooms with it. Pairs the sources call incompatible are left out. Numbers across the top match the numbers down the side.
