# Zone 6 Fruit Tree Care Calendar

Months are typical for zone 6 (worked out from a representative location with average frosts Apr 20 and Nov 2). Shift them by your local frost dates and by what your trees are doing.

For apples, pears, peaches, nectarines, plums, sweet cherries, tart cherries and apricots. Only one or two varieties of figs and persimmons are rated a good fit here, so they have no tasks on this sheet. Check off each job as you do it; small print under a month lists short jobs still running from earlier.

**All season, once started**

**ALL TREES**

Order trees for spring planting (Oct–Jan)
Water new trees on a schedule (Mar–Oct)
Water deeply during dry spells (Apr–Oct)

**PLUMS**

Pick plums as they soften (Jul–Oct)

## January

1 JOB

- ☐ Order trees for spring planting — continues

## February

7 JOBS

- ☐ Clean and disinfect pruners when cutting diseased wood
- ☐ Remove fire blight cankers while dormant — Apples, pears
- ☐ Prune out black knot galls in late winter — Cherries, plums
- ☐ Prune cherries in late winter, after hard cold — Cherries
- ☐ Prune in late winter, before bloom — Apples, pears
- ☐ Train young trees to a central leader — Apples, pears · Young trees
- ☐ Cut off root suckers and water sprouts — Apples

## March

18 JOBS

- ☐ Prune stone fruit in late winter, near bloom — Stone fruit
- ☐ Check bare-root trees the day they arrive — New trees
- ☐ Plant bare-root trees before growth begins — New trees
- ☐ Put a white trunk guard on — New trees
- ☐ Water new trees on a schedule — New trees
- ☐ Head back the new tree at planting — Apples, pears · New trees
- ☐ Cut back new stone fruit trees at planting — Stone fruit · New trees
- ☐ Remove first-year stakes the next spring — Stone fruit and cherries, pears · Young trees
- ☐ Remove first-year stakes, except on dwarf apples — Apples · Young trees
- ☐ Dormant oil window, if mites or scale were a problem † — Apples, pears · Bearing trees
- ☐ Dormant oil window, if San Jose scale is a problem † — Apricots

**Still going:** Clean and disinfect pruners when cutting diseased wood; Remove fire blight cankers while dormant; Prune out black knot galls in late winter; Prune cherries in late winter, after hard cold; Prune in late winter, before bloom; Train young trees to a central leader; Cut off root suckers and water sprouts

## April

15 JOBS

- ☐ Feed weak trees a month before bloom
- ☐ Water deeply during dry spells
- ☐ Spread young branches just after bud break — Apples · Young trees
- ☐ Apple scab window, green tip to petal fall † — Apples · Bearing trees
- ☐ Plant potted trees after the last frost — New trees
- ☐ Keep a weed-free circle around young trees — Young trees
- ☐ Remove winter trunk wraps in spring — Young trees
- ☐ Loosen ties and guards as trunks grow — Young trees
- ☐ Scout for pests as buds turn pink — Apples · Bearing trees
- ☐ Hang codling moth traps by first bloom — Apples, pears · Bearing trees

**Still going:** Prune in late winter, before bloom; Prune stone fruit in late winter, near bloom; Put a white trunk guard on; Remove first-year stakes the next spring; Remove first-year stakes, except on dwarf apples

## May

20 JOBS

- ☐ Keep insecticides off trees in bloom — Bearing trees
- ☐ Check trunk bases for borers — Apples
- ☐ Choose scaffold branches during the first summer — Stone fruit · Young trees
- ☐ Hang yellow sticky traps for cherry fruit fly — Cherries · Bearing trees
- ☐ Plum curculio window opens at petal fall † — Apples · Bearing trees
- ☐ Cut out fire blight strikes promptly — Apples, pears
- ☐ Thin heavy pear crops early — Pears · Bearing trees
- ☐ Watch for plum curculio after petal fall — Stone fruit · Bearing trees
- ☐ Thin apples to one per cluster — Apples · Bearing trees
- ☐ Pinch out shoots competing with the leader — Apples · Young trees
- ☐ Thin peaches to 6 to 8 inches apart — Peaches, nectarines · Bearing trees

**Still going:** Put a white trunk guard on; Remove first-year stakes the next spring; Remove first-year stakes, except on dwarf apples; Spread young branches just after bud break; Apple scab window, green tip to petal fall; Plant potted trees after the last frost; Keep a weed-free circle around young trees; Remove winter trunk wraps in spring; Loosen ties and guards as trunks grow

† Timing only. Follow your state or provincial extension's home-orchard spray guide and the product label.

# Zone 6 Fruit Tree Care Calendar

## June

14 JOBS

- ☐ Rub off water sprouts in early summer — Apples · Bearing trees
- ☐ Thin apricots to 4 to 6 inches — Apricots · Bearing trees
- ☐ Hang red sphere traps for apple maggot — Apples · Bearing trees
- ☐ Collect fallen cherries as fruit ripens — Cherries · Bearing trees
- ☐ Pick sweet cherries when colored and sweet — Sweet cherries · Bearing trees
- ☐ Thin heavy plum crops to 3–4 inches — Plums · Bearing trees

**Still going:** Keep a weed-free circle around young trees; Choose scaffold branches during the first summer; Hang yellow sticky traps for cherry fruit fly; Cut out fire blight strikes promptly; Watch for plum curculio after petal fall; Thin apples to one per cluster; Pinch out shoots competing with the leader; Thin peaches to 6 to 8 inches apart

## July

11 JOBS

- ☐ Pick tart cherries when soft and full-flavored — Tart cherries · Bearing trees
- ☐ Pick apricots slightly soft, July to August — Apricots · Bearing trees
- ☐ Prop or lighten limbs bowing under fruit — Stone fruit, apples, pears · Bearing trees
- ☐ Remove fallen and unpicked cherries after harvest — Cherries · Bearing trees
- ☐ Pick plums as they soften — Plums · Bearing trees
- ☐ Pick peaches when flesh yields to thumb pressure — Peaches, nectarines · Bearing trees

**Still going:** Choose scaffold branches during the first summer; Rub off water sprouts in early summer; Collect fallen cherries as fruit ripens; Pick sweet cherries when colored and sweet; Thin heavy plum crops to 3–4 inches

## August

8 JOBS

- ☐ Pick apples as the ground color turns — Apples · Bearing trees
- ☐ Pick European pears mature but unripe — Pears · Bearing trees
- ☐ Chill the harvest quickly and keep it humid — Apples, pears · Bearing trees
- ☐ Skip feeding and pruning in late summer

**Still going:** Pick apricots slightly soft, July to August; Prop or lighten limbs bowing under fruit; Remove fallen and unpicked cherries after harvest; Pick peaches when flesh yields to thumb pressure

## September

7 JOBS

- ☐ Test the planting site's soil — New trees

**Still going:** Remove fallen and unpicked cherries after harvest; Pick peaches when flesh yields to thumb pressure; Pick apples as the ground color turns; Pick European pears mature but unripe; Chill the harvest quickly and keep it humid; Skip feeding and pruning in late summer

## October

5 JOBS

- ☐ Order trees for spring planting — New trees
- ☐ Remove mummies, fallen fruit and dead twigs — Stone fruit and cherries · Bearing trees

**Still going:** Pick apples as the ground color turns; Chill the harvest quickly and keep it humid; Test the planting site's soil

## November

10 JOBS

- ☐ Wrap young trunks against winter sunscald — Young trees
- ☐ Cut grass short around young trees — Young trees
- ☐ Fit hardware-cloth guards against mice and rabbits — Young trees
- ☐ Paint trunks white after two years of guards — Young trees
- ☐ Water deeply before the ground freezes
- ☐ Rake up and destroy fallen leaves — Pears
- ☐ Rake up fallen leaves and fruit — Apples
- ☐ Peach leaf curl treatment window after leaf fall † — Peaches, nectarines

**Still going:** Test the planting site's soil; Remove mummies, fallen fruit and dead twigs

## December

10 JOBS

- ☐ Wrap young trunks against winter sunscald — continues
- ☐ Cut grass short around young trees — continues
- ☐ Fit hardware-cloth guards against mice and rabbits — continues

**Still going:** Test the planting site's soil; Remove mummies, fallen fruit and dead twigs; Paint trunks white after two years of guards; Water deeply before the ground freezes; Rake up and destroy fallen leaves; Rake up fallen leaves and fruit; Peach leaf curl treatment window after leaf fall
